

Leading the Way in Medical Dermatology

Visit
forefrontdermatology.com

We're about innovation

Our dermatologists are committed to providing the most innovative, leading-edge and appropriate medical dermatology services to detect problems before they become critical. We treat all diseases involving the skin, hair or nails with the latest technology and treatment protocols.

We're about education

Each of our physicians brings extensive training and expertise to our practice and remains at the forefront of the specialty through research and continuing education. As importantly, we educate the communities we serve, using public awareness initiatives to decrease the severity of skin disease altogether.

Skin Cancer Treatment

As the largest skin cancer treatment practice in Wisconsin and continual growth outside Wisconsin, Forefront Dermatology treats thousands of skin cancers each year offering our patients state-of-the-art Mohs micrographic surgery for the treatment of skin cancer.

Mohs Micrographic Skin Cancer Surgery

Mohs micrographic surgery is the gold standard of treatment for skin cancer, offering the highest cure rate while minimizing the risk of scarring. Our surgeons treat thousands of skin cancers annually using Mohs micrographic surgery, most of which are repaired with advanced cosmetic reconstructive surgery.
